

OXY BOLT

CLEANING WITH THE POWER OF NATURE

What is Oxy Bolt?

Oxy Bolt Effervescent Liquid Powder is a concentrated, super-charged all-purpose cleaner, that's non-toxic, biodegradable, and safe for people and the environment.

Why is Oxy Bolt revolutionary?

Oxy Bolt's "bioaugmentation technology" employs all natural plant extracts and oxygen to boost the performance of microbes that exist in dirty, greasy and oily environments. Oxy Bolt Effervescent Liquid Powder utilizes "scrubbers" that clean and restore the environment to its natural/original condition.

Oxy Bolt's Floor Cleaning Features:

- Eliminates organic stains and odors.
- Removes more grease, oil and grime than other industrial cleaners.
- pH neutral, use on any "water safe" surface.
- Will not harm hard or soft flooring surfaces.
- Will not harm tools or equipment.
- Leaves no film behind. Keeps cleaning even when you're done!
- Individually portioned and prepackaged for ease of use.
- 80% savings on average over other floor cleaners.

Oxy Bolt is the only cleaner on the market that can claim 50% liquid active ingredients in a powder (others only have 1-2%). We have harnessed state-of-the-art cleaning technology with oxygen, penetrating and rinsing agents, plus bio-stimulants to clean organic waste.
